Vol. 16 No. 1 January–February 1994

General Article

1 A comparative study of Piagetian and constructivist work on conceptions in science
N. Marín and A. Benarroch

Research Reports

17 The qualitatively different conceptions of 1 mol
Helge Strömdahl, Aina Tullberg and Leif Lybeck

27 Students' engagement in practical problem solving: a case study
J. R. Watson

45 An investigation on the effectiveness of physics teaching in Italy
Vittoria Cinquini, Ornella Robutti, Antonio Bruno Vincenzi and Paolo Violino

63 Alternative conceptions in Galilean relativity: frames of reference
Sudhir Panse, Jayashree Ramadas and Arvind Kumar

83 Humanizing and feminizing school science: reviving anthropomorphic and animistic thinking in constructivist science education
Mike Watts and Di Bentley

99 A developmental approach to cognitive change in mechanics
Gérard Lemeignan and Annick Weil-Barais

Book reviews

121 Communicating in School Science: Groups, Tasks and Problem Solving 5–16
Di Bentley and Mike Watts
Reviewed by *Carolyn J. Boulter*

122 Talking Science: Language, Learning and Values
Jay L. Lemke
Reviewed by Clive Sutton

122 Industrialists and Teachers: Case Studies and Developments
Gary Forest, Andrew Miller and Julia Fiehn (eds)
Reviewed by *Michael Weller*

123 Probing Understanding
Richard T. White and Richard F. Gunstone
Reviewed by *John Oversby*

Vol. 16 No. 2 March–April 1994

125 Editorial. The special issue for 1995: an invitation to contribute
Peter Fensham

Research Reports

127 A response to 'Gender issues: some methodological and theoretical issues'
Peter Hewson, Deanne Howell, Barbara Smentek and Regina Toolin

131 'Work' and 'Heat': on a road towards thermodynamics
P. H. van Roon, H. F. van Sprang and A. H. Verdonk

145 Students' conceptions of 1 mol and educators' conceptions of how they teach 'the mole'
Aina Tullberg, Helge Strömdahl and Leif Lybeck

157 Stages of children's views about evaporation
V. Bar and I. Galili

175 Who will teach the 'nature of science'?: teachers' views of science and their implications for science education
Susanne Lakin and Jerry Wellington

191 Stoichiometric problem solving in high school chemistry
Hans-Jürgen Schmidt

201 Facilitating conceptual change using analogies and explanatory models
David E. Brown

215 The conception of force and motion of students aged between 10 and 15 years: an interview study designed to guide instruction
Daryll Twigger, Malcolm Byard, Rosalind Driver, Stephen Draper, Roger Hartley, Sara Hennessy, Ramzan Mohamed, Claire O'Malley, Tim O'Shea and Eileen Scanlon

231 Towards creating effective learning environments for science teachers: the role of a science educator in the tertiary setting
Tim Hardy and Valda Kirkwood

Vol. 16 No. 3 May–June 1994

General Article

253 Toward a global understanding of nuclear energy and radioactive waste management
Richard R. Powell, Michael G. Robinson and William Pankratius

Research Reports

265 Drawing during science activity in the primary school
Dorothy Hayes, David Symington and Marjory Martin

279 Student ideas of science concepts: alternative frameworks?
Jaap Kuiper

293 Metaphor as a tool for constructivist science teaching
Stephen M. Ritchie

305 Systemic model of conceptual evolution
Máximo Luffiego, Mª Félix Bastida, Francisco Ramos and Julio Soto

315 Single-sex schools and physics achievement: are girls really advantaged?
D. Young

327 Girls and physical science: the impact of a scheme of intervention projects on girls' attitudes to physics
J. O'Brien and G. C. Porter

343 Integration of indigenous thought and practice with science and technology: a case study of Ghana
J. M. Yakubu

361 Pupils' images of scientific epistemology
Joan Solomon, Jon Duveen and Linda Scott

Vol. 16 No. 4 July–August 1994

General Article

375 On the significance of journals in science education: the case of *IJSE*
John K. Gilbert

Research Reports

385 Students' beliefs about conceptual knowledge in introductory physics
David Hammer

405 Children's and lay adults' views about thermal equilibrium
Mike Arnold and Robin Millar

421 Student science knowledge related to ecological crises
Michael J. Brody

437 Science discourse through collaborative concept mapping: new perspectives for the teacher
Wolff-Michael Roth and Anita Roychoudhury

457 A Nobel's eye view of scientific intuition: discussions with the Nobel prize-winners in physics, chemistry and medicine (1970–86)
Ference Marton, Peter Fensham and Seth Chaiklin

475 What is science?: preservice elementary teachers' conceptions of the nature of science
Sandra K. Abell and Deborah C. Smith

489 Book Reviews

Vol. 16 No. 5 September–October 1994

Special Issue: Teacher Development

493 Editorial
Beverley Bell

497 Student-teacher reflection: developing and defining a practice that is uniquely one's own
Anthony Clarke

511 The construction and reconstruction of the concept of the reflective practitioner in the discourses of teacher professional development
Jane Gilbert

523 Metacognition and learning to teach
Richard F. Gunstone and Jeff Northfield

539 Physics teachers' conceptions of learning, teaching and professional development
Ineke Huibregtse, Fred Korthagen and Theo Wubbels

563 Qualitative physics and students' ideas: a physics teacher's story
Peter W. Hewson and Timothy P. Olsen

575 Using anecdotes in teacher development
Beverley Bell

585 Perspectives on learning to teach science: insights and dilemmas from a collaborative practicum project
Gaalen Erickson, Jolie Mayer-Smith, Alberto Rodriguez, Peter Chin and Ian Mitchell

599 School–tertiary collaboration: a long-term view
Ian Mitchell

Vol. 16 No. 6 November–December 1994

General Article

613 HPS and school science education: remediation or reconstruction?
E. W. Jenkins

625 Scientific thought as dogmatism
Bryant E. Griffith and Garth D. Benson

Research Reports

639 A case study of a national science curriculum and teacher conflict
Alejandro José Gallard and James J. Gallagher

649 Knowing and teaching science: the constructivist paradox
W. Louden and J. Wallace

659 Factors affecting students' choice of science and engineering
Brian E. Woolnough

677 Toward a functional learning system for Solomon Island secondary science classrooms
P. M. Ninnes

689 Book reviews
